DETAILED ACTION

Allowable Subject Matter

Claims 1-31 are allowed.

Reason for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or suggest a grey glass composition having the base glass composition and colorant portion as recited in the instant claims, which result in the recited properties specifically the visible, IR, UV, and total solar transmittance.

The closest prior art is deemed to be U.S. Patent Application Publication 2003/0216242 A1 by Boulos et al. Applicants' Representative points out in the Appeal Brief filed 9 May 2006 that while Boulos et al. disclose a neutral gray glass composition, the glass of Boulos et al. does not result in the glass of the instant invention. Specifically, a gray glass consisting essentially of the colorant portion as recited in the instant claims, which results in the low IR, UV, and TS transmissions as recited in the claims. See Appeal Brief pages 11-22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
